

Looking for ways to streamline your business process?

Case Study:

Total Repair Express needed to track surgical equipment repairs. MedTrack™ is a custom software application designed to track the repair management process, in real-time, from point-of-service through billing, for over 20,000 instruments a month.

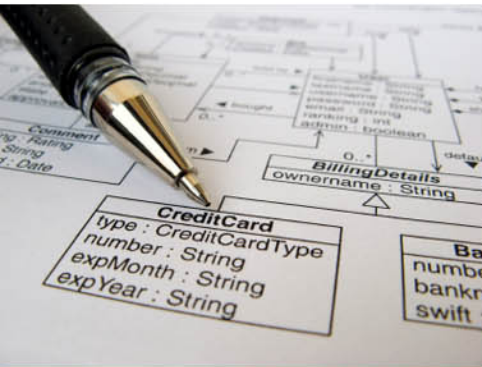

This software was instrumental in supporting the growth of the firm from a \$2M, 15 employee firm to a \$25M, 160 employee firm over a 6 year period.

What bothers you about the way your business runs today?

Are there tasks that you know could be done faster?

Perhaps the systems you rely upon are limiting your company growth?

Through custom application development, you'll take advantage of technology to automate aspects of your business. The results can be dramatic:

- Reduce inefficiencies and errors
- Increase speed and volume
- Reduce waste
- Free your resources for other important tasks
- New revenue streams

Let's talk about how to achieve your business goals.

Business Automation Experts helps business owners become profitable by automating business processes and ensuring business continuity. Contact us for a Free Business Assessment.
